

Durlon® Gaskets and Services

Gaskets

Eliminate Gasket Failure and NARs (Non-Accident Releases) With Durlon® Gaskets, Services, and Technical Expertise

The elimination of NARs is critical for safety, environmental responsibility, and economical concerns. Shippers, loaders and un-loaders must pay special attention to their gasketing procedures. Insist on authentic Durlon® brand gasketing from Salco to guarantee quality production, performance, service and technical support.

Common Causes of Gasket Failures:

- ♦ Uneven flange loading caused by uneven bolt tightening
- ♦ Insufficient gasket loading
- ♦ Too much bolt and/or nut friction
- ♦ Bolt strength too low
- ♦ Torque loss
- ♦ Bolt Relaxation/Stretch (10% in first 24 hours)
- ♦ Gasket creep
- ♦ Vibration in the system
- ♦ Interaction between bolts during tightening
- ♦ Improper gasket installation practices

Durlon® Signature Products

Durlon® 8500

Durlon® 9000

- For all your applications including pressure plates, safety valves, bottom outlet valves, angle valves, manways, and other fittings
- Listed in the Chlorine Institute Pamphlet 95 - Gaskets for Chlorine Service. (Durlon® 9000 - Blue)
- Universal use in the Ethanol Industry. Durlon® 8500 has passed a modified API 607 Fire Test
- Salco Expertise: Our gasket specialists will ensure proper compatibility
- Consolidation: Enhance plant safety, reduce inventory, and avoid confusion. Our experts can assist you in limiting the number of your gasket styles
- Color coding of gaskets for easy identification also available

Testimonial - Sunoco, Inc. "We were pleased to learn through testing by our laboratory that Durlon® 9000 material is acceptable for use in all commodities we ship. Simplifying to one gasket material has helped Sunoco with compatibility, performance, and standardization. We have confidence in the suitability and traceability of the branded Durlon® 9000 gasket material and have received excellent technical support and customer service."

Our Commitment is to Provide The Best Gasketing Products, Programs and Services

What Questions Do You Have Concerning Your Current Gasket Program and Services?

For example: What should you do when...

- you want to give your supplier a car number and have him immediately send gaskets to wherever you determine for that car?
- you have a leak because incorrect torque was applied?
- you need an analysis performed to determine the cause of gasket failure?
- you have cars held up because you don't have the time and/or resources to manage your gasket inventory?
- you need to minimize the number of materials you currently use?

Answer to All: Contact Salco
