Tank Car Parts

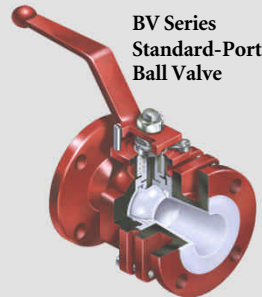

A New Generation Of Ball Valves For The Transportation Industry

Salco is the North American Transportation Market Segment Distributor of ITT Engineered Valves' line of Richter™ and Cam-Line® valves and accessories

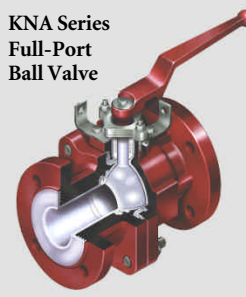

Richter High Performance Standard-Port and Full-Port Valves

The BV Series offers exceptional product quality in a standard ported ball valve design. The BV is characterized by thick-wall linings of PFA or FEP fluorochemicals housed within a body construction of ASTM A395 cast ductile iron. This combination of materials ensures problem-free operation in the most highly corrosive chemical services and under demanding thermal conditions.

Available in ½" - 8" sizes

BV Series
Standard-Port
Ball Valve

KNA Series
Full-Port
Ball Valve

AAR-Approved

Salco can also provide Richter control valves, check valves, butterfly valves and actuators

Designed to provide service where maximum flow and minimum pressure drop is desired, this full-port ball valve meets your ANSI piping-system requirements. The KNA Series features ANSI B16 face-to-face dimensions and ANSI B16.5 Class flanges, making it suitable for installing into virtually any type of piping. Constructed of ASTM A395 cast ductile iron. Also available in stainless steel.

Available in ½" - 6" sizes

Cam-Line® Trunnion Ball Valve

Available in
¾" - 6" sizes

Cam-Line plastic-lined trunnion ball valves offer numerous proven design benefits, including tight shut-off, reliable stem sealing, and unsurpassed torque reduction - all unique features in a plastic-lined valve design. With special Tefzel® or polypropylene linings and PVDF coatings, Cam-Line ball valves are well suited for highly corrosive applications within the chemical processing industry. Other Cam-Line design features include: Trunnion support for the ball; top-entry design; and live-loaded stem seal.

Features Include Live-Loaded
Multi-Ring Stem Packing

Salco's full line of transportation valves includes Xomox Valves; Watts Regulator Valves; Watts Flanged Valves; Apollo Valves; Girard safety relief Valves; Durco T-Line Plug Valves; ARI Valves; and TYCO Flow Control Valves
