

Elevated Platform Fall Protection

Safety Appliances

Retrofit Your Platforms With Our High Quality, Versatile Midrails and Toe Boards

NO WELDING REQUIRED,* custom-designed to fit your fleet, fall protection products that meet Federal Railroad Administration (FRA) requirements

Midrails: Midrails enclose tank car platforms and provide protection to keep workers from slipping and falling

- Midrails can be retrofitted to accommodate existing platforms with bolt-on designs
- Midrails available in a powder coat finish or any color coat to suit your fleet

Toe boards: Added toe boards help protect workers from slipping off as well as protecting workers below from tools or other objects accidentally kicked or sliding off the platform

- Simple installation design accommodates varying width platforms

Midrail design applied to a split platform

Salco designs midrails that meets the requirements of FRA Technical Bulletin MP&E 98-14 – Safety Appliance Securement and Technical Bulletin MP&E 00-06 - Manufacture and repair of operating platforms and operating platform safety railings on tank cars without underframes

All assembly fasteners are constructed of stainless steel, corrosion resistant, and self-locking

**Some applications may require drilling and trimming during the installation*
