

Draw Product Sample Safely and Effectively With Our Low-Maintenance, User-Friendly Sampling Devices
Developed for sampling aggressive liquids, such as acids and chlor-alkalis, our corrosion resistant equipment makes acquiring samples easy

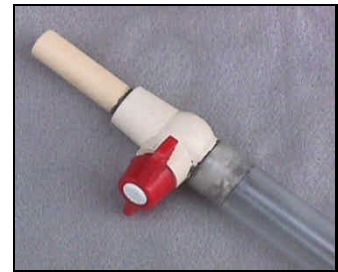

Sample Pump: Allows for a spill-free sample to be taken at the product line without the need to open the top of container system. The hand-operated plunger allows for a spill-free transfer from tank to sample bottle.

Constructed of PVC, this user-friendly device can also be mounted onto any of our parallel instrument tees for sample draw applications

Actual length of sample tube is five feet

Sample Stick: Used for retrieving product sample, our user-friendly sample stick also has the ability to transport withdrawn sample. It is constructed of clear PVC, corrosion resistant, lightweight, and low maintenance. The Sample Stick utilizes a ball valve and one-way flow check valve
