

Weld Nuts of any Size and Thread for All Applications

Weld nuts are specifically designed to be welded around preconfigured holes to provide firm, fixed fasteners for bolt connections

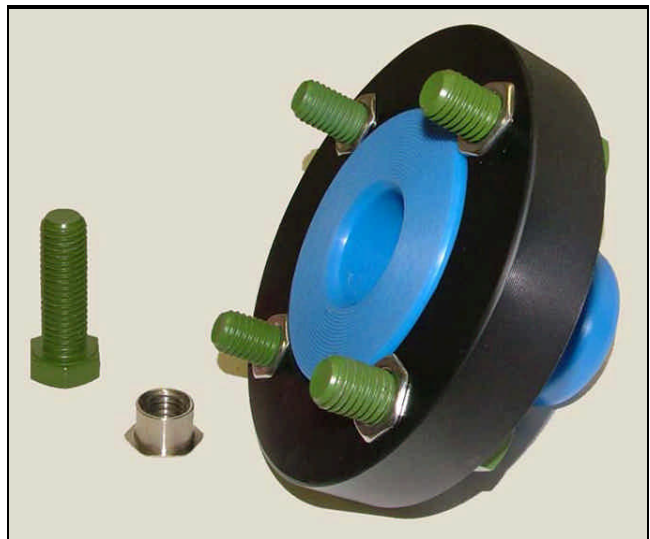

By using weld nuts, studs are secured in their respective flanges rigid, which makes assemblies faster and safer

Weld nuts and Teflon[®] coated bolts applied to hose fitting →

[®]registered trademark of DuPont

KEY FEATURES/BENEFITS

- Helps eliminate the loss of fasteners, which typically get misplaced in a conventional set-up
- Allows one person to assemble hose ends with ease
- Secures studs from falling out
- Available in any thread and size
