

## Weld Nuts of any Size and Thread for All Applications

*Weld nuts are specifically designed to be welded around preconfigured holes to provide firm, fixed fasteners for bolt connections*

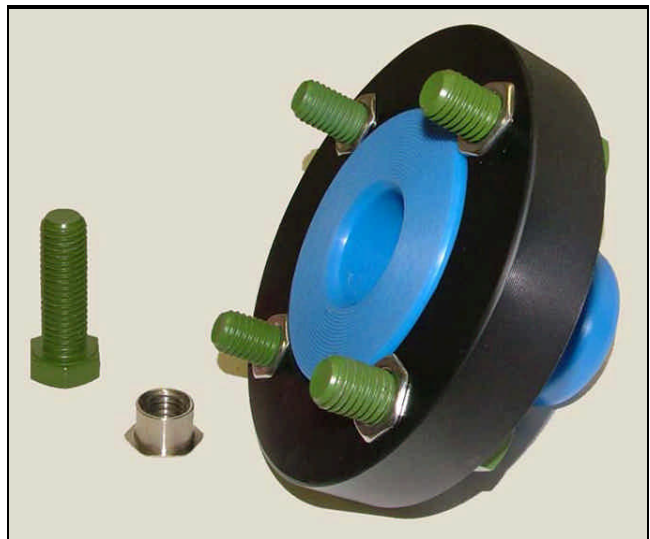

By using weld nuts, studs are secured in their respective flanges rigid, which makes assemblies faster and safer

*Weld nuts and Teflon<sup>®</sup> coated bolts applied to hose fitting*

*<sup>®</sup>registered trademark of DuPont*

### KEY FEATURES/BENEFITS

- Helps eliminate the loss of fasteners, which typically get misplaced in a conventional set-up
- Allows one person to assemble hose ends with ease
- Secures studs from falling out
- Available in any thread and size
